rcollard88@gmail.com

Leitchfield, KY, US

Summary

I am an experienced front-end web developer with additional skills in the back-end. I create modern web applications using new technologies introduced to the field to provide a high-quality product to the consumer.

Work Experience

Freelance

Nov 2022 - present

Web Developer

- Build web applications using React and TypeScript
- Create real-time chat application using MongoDB, Express, React and NodeJS
- Structure components in a reusable, scalable manner
- Assist other developers with development of web site for non-profit

Indiana/Kentucky/Ohio Regional Council of Carpenters

Nov 2014 - Oct 2022

Journeyman Carpenter

8 years

- Communicated with a team and management daily, performing assigned tasks quickly and efficiently
- Managed and created solutions for projects requiring additional details by engineers
- Created prints and diagrams with accurate measurements to provide stable structures
- Adapt to changes in situations which require immediate action

Hibbett Sports

Aug 2010 - Oct 2014

Store Manager

4 years

- Led and supervised a team of employees
- Effectively managed store operations and task delegation
- Managed inventory and resources, purchasing supplies and products
- Interacted with customers, addressing and resolving issues
- Analyzed sales data & customer trends and adjusted to changes to increase revenue

Key Projects / Involvements

- Worked with a small team of developers to create and pitch a web site to a local non-profit food pantry
- Using the MERN stack, created a web application users can use to chat with other users. Created many methods of customization unique to each user which can be changed.
- Took part in the construction of the Lewis and Clark bridge in Louisville, KY, which required strict cooperation between hundreds of other workers, teams and trades in order to complete.
- Built large electrical vaults throughout the city of Louisville, KY, within strict specifications and guidelines in order to provide a safe working space with sufficient ingress and egress for city personnel.
